The Partnership for Action on Green Economy brings together the expertise, convening power and networks of five UN agencies – UN Environment, the International Labour Organization, the UN Development Programme, the UN Industrial Development Organization and the UN Institute on Training and Research – to support countries and regions in addressing one of the most pressing challenges of the 21st century: transforming their economies and financial systems into drivers of sustainability and social equity. The Partnership supports nations and regions in reframing economic policies and practices around sustainability to foster economic growth, create income and jobs, reduce poverty and inequality, and strengthen the ecological foundations of their economies.

PAGE works to build capacity within partner countries so that they are able to provide favourable conditions to meet their sustainability commitments, in particular the Sustainable Development Goals and the Paris Agreement, through inclusive green economy approaches.
